Winter 2016 Chemistry Labs: Seats Available – Enroll NOW!

There are plenty of seats available in the following Chemistry Lab Courses:

**CHEM 7LM** is the same as the CHEM 7L lab, but the 7LM majors lab gives chemistry majors an opportunity to take this important prerequisite course earlier on in your academic career as well as a chance to take courses with other chemistry majors and begin to network. The same lab course policies apply for CHEM 7LM and CHEM 7L.

**CHEM 143AM** is open to ALL students who have met the pre-requisites (CHEM 7L & CHEM 140A), but Chemistry/Biochemistry majors are especially encouraged to enroll. The course content in CHEM 143AM is equivalent to CHEM 143A, but 143AM emphasizes instrumental methods of product identification, separation, and analysis. The same lab enrollment and safety policies apply to CHEM 143AM and CHEM 143A.

Looking for a course to fulfill your upper-division Chemistry Lab elective? Want an excellent instructor? Check out **CHEM 109 – Recombinant DNA Lab with Prof. Johnson**! Pre-requisites are CHEM 143A and CHEM 114A.

Correction: The event will be on THURSDAY, Nov. 19th at NSB Terrace from 11:30am-1pm

Meet our Graduate Funding Coordinator, Melanie Fernandes

Melanie joined the Student Affairs team this year and is primarily responsible for graduate funding and payroll, TA-ships, purchasing, reimbursements, and travel awards. Graduate and undergraduate students seeking part-time work with flexible hours should submit an ASE application as there are many opportunities that open up for graders and proctors throughout the quarter.
