Hi Jennifer,

The Bioinformatics major is incredibly detailed and spans in 4 different departments. Because of this, the development panel had to be more selective with the coursework it required for the major and that is why some courses were not included in the major. It was decided that the courses were not critically essential for the success for the major.

This is why we waive prerequisites for the following courses below:

CHEM 114B, CHEM 114D, CHEM 109, CHEM 108, and CHEM 127

You will need to contact the department when you are going to enroll in the course prior to your enrollment time so we can clear you to register for the courses.

Best,

Oura
